2026
Continuous training in Design & AI, Shift+R (shiftr.pro)

2001-2002
Master of Information Systems for e-business, University of Deusto (Spain)

1991-1996
Audiovisual Designer, Cinema & Communications, UBA (University of Buenos Aires, Argentina)

Languages

Spanish | Native
English | Professional

Sustainability Credentials

Action Against Hunger
Introduction to Sustainability
Universidad Politécnica de Madrid
Nature-Based Solutions (NBS) for Sustainable Construction

CECILIA VERA BATTAGLIA

Product Design Lead | Digital Product Designer at adidas

15+ years in UX consulting and product design, blending research, service design, design systems, and strategy to craft impactful Minimum Lovable Products. Between 2012 and 2014, worked as a Senior UX Designer (freelance) across different companies and sectors in England and Ireland. Exploring emerging UX patterns, AI-assisted design workflows, and AI-driven interaction models to create innovative, user-centered experiences.

Beyond product design, I translate technical value into clear business narratives and mentor professionals in storytelling, design thinking, and execution to accelerate adoption and measurable impact.

Work experience

Adidas, Product Design Lead, 2024 - Currently

- Previously in the Content Technology area, led the creation and scaling of internal tools, including a headless CMS built on Strapi, integrated with internal and 3rd-party software such as Monetate, Cloudinary and Airtable.
- Currently, within Digital Retail & Wholesale and the Partner Program, leads the team creating AI-based tools for Adidas's biggest clients.
- Leads stakeholder alignment workshops with Product Owners, engineering and business teams to define scope, priorities and trade-offs for complex B2B applications.
- Works daily with Product Owners and tech teams, using AI-assisted prototyping to iterate quickly and shape the end-to-end design of complex B2B applications.
- Creates and maintains reusable UI components within the platform's design system, ensuring consistency and scalability across products.
- Owns end-to-end UX and UI design for ASSIST, Adidas's Salesforce Service Cloud case management platform, and for Click, the digital wholesale ordering tool — covering interaction patterns, UX writing and UI components aligned with the Yarn design system.

Pegasystems, Principal Product Designer, 2022-2023

- Within the Discovery area, led the creation of demos for various sectors and participation strategies, with a differential in storytelling.
- Applied ResearchOps to systematise qualitative information, focused on Go-To-Market for no-code and low-code applications for Citizen Developers such as Pega Platform, CDH, Pega Customer Service and Pega Sales Automation.
- Designed UX and UI flows for demo environments across Pega Platform, CDH and Pega Sales Automation, translating discovery insights into consistent, reusable interface patterns.
- Improved standards across demo formats and video performance, and introduced new deliverables for internal and external customers within Go-To-Market/DemoX.
- Contributed to the design system, creating reusable UI components and maintaining shared libraries to ensure consistency across demos and platforms.

HEINEKEN, Freelance Lead Researcher, 2021

- Led the Cloud Workplace project to transform Heineken Spain's technology model, focusing on employees and a user-centred work environment proposed by Digital & Transformation (D&T).
- Established the project's lines of work: pilot, qualitative research, and rollout.
- Helped Heineken Spain reshape its post-pandemic technology model around a more employee-centred, simplified day-to-day experience.

Lobo Digital (Spain-Japan), Design Lead, 2019-2021

- Mapped end-to-end customer journeys and translated them into screen designs for Japanese clients, supporting the platform's westernisation strategy.
- Defined key objectives and KPIs in collaboration with the Japan office, covering budgeting, planning and backlog prioritisation.
- Supported development teams with reporting, analysis and digitisation of end-to-end processes.

El Corte Inglés, Lead Product Designer, 2018-2019

- Defined strategies and product roadmaps for the business unit.
- Communicated with end customers to systematise qualitative information through ResearchOps.
- Analysed quantitative data to generate actionable insights for product improvement, and reviewed documentation for accuracy and excellence.

BBVA (via Globant), Lead Product Designer, 2017

- Led two projects built from scratch for BBVA Spain and Global (Baby Planner and B-economy), defining a Go-To-Market strategy delivered in record time.

- Coordinated and supervised research teams, visual and service designers, front- and back-end developers, PO, and Data & Analytics/Big Data teams end-to-end.
- Took both products from concept to market launch in under a year, across Spain and Global BBVA.

Softtek (formerly Vector ITC Group), Design Manager, 2011-2012 and 2015-2016

- Established the UX department, recruiting and mentoring a team of 10+ consultants.
- Introduced methodologies including Design Thinking, Service Design, qualitative research and testing.
- Contributed to the sale of strategic projects and developed MVPs to help start-ups secure financing.

Sogeti Spain, Senior UX Designer & Tester, 2008-2011

- Led UX and system testing strategy over a 2-year period across complex software programmes for clients including Correos de España, Loterías del Estado and Citibank, among others, establishing structured governance and quality frameworks.
- Managed multidisciplinary teams and contributed to commercial positioning and delivery excellence.

Selected Achievements

- Took two BBVA financial products from concept to market launch — across Spain and Global — in under a year.
- Built and scaled a UX function from the ground up at Vector ITC Group, growing it into a team of 10+ consultants and selling strategic UX/Service Design engagements.
- Led the post-pandemic redesign of Heineken Spain's technology model around a simplified, employee-centred way of working.

Hard Skills

Product Design	User Experience (UX)	Usability Testing	Figma
Enterprise Application Software	Information Architecture	Onboarding Strategies	
Workflow Management	Software Design Patterns	Component Libraries	Design Systems
Customer Journey Mapping	Problem Framing		

Tools
